ABOUT SEAGULL MARITIME

Introduction

Seagull Maritime is a Private Maritime Security Company (PMSC) which was founded by Naval Commando veterans, to address maritime security threats and to supply high quality professional service based on the elite commando force knowhow. Seagull Maritime offers a range of maritime security services and maritime solutions including Anti-Piracy services for safe and secure voyages of vessels transiting the High-Risk Areas (HRA) of the Gulf of Aden, the Indian Ocean and the Red Sea, port security, Rigs security, advanced Technology products, training, supply, intelligence and C4I solutions.

Most of Seagull's management and security leaders served in Special Operations units. Our professional security guards have served in combat units and have operational and maritime experience. The skilled security teams have effectively withstood numerous pirate attacks, with an unsurpassed track record and no damage whatsoever to crew or ship.

Mission Statement

Quality and Security entwined. Those who have experienced combat situations understand the devastating outcome of using weapons. One of our mottos is the "purity of weapons". Although this may seem to be an oxymoron, it means that weapons should only be used for defence – when there are no other alternatives – and with the utmost sensitivity. We see our mission as supplying safety and security while doing the utmost to prevent un-necessary friction with the attacker. This is Seagull Maritime's basic principle of operation

We believe in giving our customers the confidence that you can conduct your business without security concerns. We put a great emphasis on the regulatory and legal aspects of our operations.

Company Context

Seagull Maritime has required licenses to work in all relevant ports. Seagull holds accreditation for ISO 28007-1:2015, ISO 28000:2022 and ISO 9001: 2015.

We have very clear and in-depth SOP & RUF and all other relevant procedures and manuals in place - all based on the concept of prevention and security actions in the civil maritime industry. Our SOP & RUF are up-dated according to the experience and lessons learned from our activities at sea. Our teams are trained and instructed accordingly.

Seagull trains its own and cooperates with maritime security training schools in Ukraine. This school is designated for our security personnel, where Seagull PCASPs are trained in counter piracy tactics, regulations & intelligence, international law, company procedures, etc.

We are fully compliant with all regulatory and legal requirements as outlined by the International Code of Conduct (ICoCA), Flag States, P&I Clubs, and other bodies within the PMSC industry.

Company Structure

Seagull Maritime is registered in Malta as a Limited Liability Company. This enables us to be in contact and execute our services in all countries and ports worldwide.

Our Management

The management of Seagull Maritime has extensive experience in commanding and leading special operations, both in the Naval Commando and elite Special Operations units. We bring to the Maritime security industry an approach of comradeship, honesty, loyalty, transparency, sensitivity and professionalism, together with an experienced business environment.

Our top management:

Pavel Shparber – CEO – Pavel served as a combat instructor in the military (infantry) and has experience both in close protection and in infantry warfare, and vast experience in the maritime security industry.

Olga Zuck-CCO -Previously a leading Business development and Marketing Manager for various companies. During absence of CEO took over all their responsibilities overlooking operations of all departments across the company reporting directly to the business owners.

Darren Watts – Group Compliance Director - Formerly British military, has worked in the maritime security industry since 2011 and has implemented and has advised on ISO implementation and maritime security compliance to multiple PMSC's and clients.

Eugene Lukshin- QA & Compliance Manager- Implementation and management of various procedures and programs for Seagull Maritime. Started as an operations coordinator, proved his knowledge throughout the years of work in the company.

Seagull Maritime Offerings

Indian Ocean Security Teams: Security teams comprised of highly professional and experienced armed security guards equipped accordingly to secure client vessels across the former HRA.

West Africa Regional Security: Seagull has a well-established footprint in West Africa with a fleet of SEV's operated under a MOU with our local partners and also able to offer on-board security in applicable regions.

Legal and regulatory compliance: Compliance with all legal and regulatory requirements

SOP & RUF: Clear, in-depth and efficient maritime security doctrine (SOP & RUF).

Embarkation and disembarkation in all ports: Embark and disembark in all ports throughout the HRA and proven ability with clearances to enter ports with armed teams on board (detailed ports list - below).

Intelligence & Risk Analysis: Our partner, Vanguard, offers a full suite of maritime intelligence and digital risk management including catering for both specific HRA voyages, ongoing fleet management, Ship Security Alert System (SSAS), digital guarding and crisis response.

24/7 Call Center: Call and Operations Center - 24/7, 365 days a year - for quick response, intelligence updates and risk assessment.

Security equipment: Our teams carry state-of-the-art personal protections equipment, communication systems and advanced firearms suitable for the naval combat. Upon request we can supply a range of non-lethal prevention equipment. All equipment and weapons are owned by Seagull.

Vessel Based Armouries: Our VBA partner,PSS, allows us to hold and store weapons and team on floating armouries strategically located around the Indian Ocean and Red Sea providing unique and flexible embarkation and disembarkation of our security teams throughout the area.

Operational Points of Embarkation / Disembarkation in the former HRA:

Suez/ Port Said, Egypt, Aqaba, Jordan, Galle, Sri Lanka Mombasa, Kenya, 18N Red Sea, 11N Indian Ocean, Tanzania, 13N Arabian Sea, Moroni, Comoros Islands, Fujairah, UAE Toamasina/Tolagnaro/Toliara, Madagascar, Muscat, Oman Port Louis, Mauritius, Salalah, Oman, Durban, South Africa, Djibouti, Djibouti Port Klang, Malaysia

Unarmed teams can Embark/Disembark in Indian ports, Saudi Arabia and all other ports using Seaman Books.

Embarkation/Disembarkation of armed team in any other port will be discussed upon request.

INDIAN OCEAN OPERATIONS

Our Security Personnel

Our security personnel are permanently employed by Seagull Maritime and are committed to our work code and ethics. Seagull's security guards are veterans of elite military combat units with operational maritime experience. They have all the needed qualifications to work in the maritime civilian business industry.

Our guards, all exclusively employed by Seagull, have served in military combat units and have been selected by Seagull Maritime management after a strict screening and recruiting process. Our European offices are in daily contact with our EU guards.

We provide security teams that consist of highly experienced European veterans who serve both as Team Leaders and security guard as well as Asian security teams sourced from reputable providers.

MSO Certification

All our security personnel undergo certification checks to include:

- STCW95
- Clean Criminal Background check
- Yellow Fever Vaccination
- Discharge Diploma From the Military
- Seaman Book Service
- Medical Test Certificate (ENG1) or equivalent for the person's home nation
- Seagull's Maritime Operator (or equivalent) Course
- SSO

Recruiting

We select our security personnel from military combat units with good credentials and recommendations. These highly motivated professionals undergo a rigorous screening process that is comprised of the following stages: initial screening, physical & mental checkup, criminal clearance and interviews.

Training – "We train our own"

As a provider of security services, which rely on the performance of the deployed teams, we view the training process as of high importance.

Following the strict screening and recruiting process, our European security guards undergo all needed civilian maritime qualifications and specific training of Seagull Maritime in our own facilities in Europe. Our Asian team members are recruited and trained locally to our requirements and remotely refreshed and screened by our dedicated HR team.

Seagull Maritime is improving its training methods periodically. Our training is based on the Naval Commando doctrine and incorporates the vast experience we have accumulated in hundreds of secured voyages in HRA.

The security guards complete the following training:

- Standard of Training and Certification and Watch Keeping course (STCW) Ship Security Officer (SSO)
- Firearm range and weapons training on all types of weapons used by Seagull
- Drills and training on board actual vessels in port - regarding maritime security protocol
- Intelligence briefing on piracy – modus operandi, equipment, etc. maritime industry - maritime law, vessel types, flag states, maritime organizations, etc. Seagull Maritime Operational Doctrine (SOP, RUF, etc.) curriculum First Aid refresher course

Training Facility

As part of Seagull Maritime's aspiration for the highest level of professionalism both from the On-Shore HQ and our Off-Shore security personnel, and our desire for constant improvement, we have opened a training school for PCASP and developed a program to train Seagull Maritime Security Operators.

This school is designated for our security personnel, where Seagull PCASP are trained according to our training regime and company standards. All our PCASP undergo a rigorous screening process before going into our training regime.

Training Programs

Seagull Maritime MSO and TL training programs are overall training regimes that prepare our selected personnel for the complex security work in the maritime environment. The programs relate to all aspects physical, mental and professional which result in a complete Security Operator and highly capable TL.

Courses Syllabus: SMSO - Seagull Maritime Security Operator

1. Working on board security
2. SOP familiarization
   (a) DETERING (BMP5, Boarding prevention measures, Onboard vessel security assessment)
   (b) DETECTING (RADAR & detection aids, HRA routines, Detection guide (suspicious signs)
   (c) DEFENDING (Personal tactics, Team tactics, RUF & DTMO flowchart, Extreme scenarios, Security equipment familiarization
3. SMS SOP framework (SOP handbook, Working with OPS department, Intel& Risk Assessments, etc.)
4. Recent Intel
5. Weapons - Practical training
   (a) Safety protocol for arming and disarming rifles
   (b) Weapons maintenance training
   (c) Weapons range
6. Hand to hand combat techniques
7. Onboard tactics – Practical training

8. Test

Note: Trainees that do not already hold STCW, SSO and Seaman Book go through these courses prior to Seagull Security Operators course at the same facility under ESA instructors.

SMS TL – Seagull Maritime Security Team Leader

1. SOP full brief
2. Candidate SOP presentation
3. TL formalities
4. TL reporting
5. Advanced detection
6. Weapons safety shooting range management
7. Onboard training program management
8. Operational videos case studies analysis
9. Intel brief for TLs 10.OPS brief for TLs
1. Company Procedures
2. Seagull Maritime Standard Operating Procedures (SOP) & Rules for the Use of Force (RUF)

Weapons and ammunition

All security teams in the Indian Ocean region will embark with the following:

- Semi-automatic rifle per guard from the following types: Browning BAR Mark II – 7.62mm, Izhmash AK47 Saiga – 7.62mm, Belgian FN L1A1 – 7.62mm, Norinco AK47 – 7.62mm
- Ammunition – a minimum of 200 rounds per weapon
- Telescopic sights for long distance deterrence Personal protection equipment:
- Body armour*
- Helmets*
- Medical kit Supporting equipment
- Binoculars
- Night vision device
- Video camera recorder
- Flashlight
- Laser device Communication equipment:
- Satellite phone (Iridium / Inmarsat)
- Tactical radios

** We can supply additional Body Armor and Helmets for the safety of the vessel bridge crew (Methodology of supplying the equipment will be discussed).*

Operating Procedures

Our SOP & RUF reflect Seagull's obligations for a graduated, reasonable response impaling the minimum necessary measures of force to disable an attack. Our SOP & RUF are compliant with BIMCO GUARDCON and the most rigorous industry standards.

Twice a year we review our SOP & RUF based on the past several months experience and the up-dated information of the threats, intelligence and risk assessment. This insures an updated and precise method of operation that addresses the maritime threats.

Seagull's SOP aims to guide our Armed Security Guards through their operational mission to:

- Maintain a highly professional and unified level of service by all our teams.
- To protect and secure the crew and vessel, and not to combat piracy worldwide.
- Provide effective security services at high standard through the changing conditions and situations that occur in the maritime environment.
- Help the security guard clearly understand all his duties on board and professionally perform his mission.

The SOP, other than providing a complete framework through all stages of a transit, sets a clear tactic for enhanced threat detection and effective measures of response.

Seagull's RUF aims to provide the security guards, employed by Seagull, the guidelines for reasonable, graduated, minimal and accurate response to potential threats unfolding in the operational environment of the HRA. The RUF clearly emphasize Seagull's values and obligations to:

- The natural right of all for: life, liberty and self-defence, and to protect others from life threatening threats.
- The right for free passage of passengers and commerce through the high seas. The inherent right to practice measures of self-defence in situations when human lives are in danger.
- Seagull condemns any unnecessary use of force.

We see our mission as supplying safety and security while doing the utmost to prevent un-necessary friction with the attacker.

Post Transit Reporting

At the end of each security mission, the security team leader prepares a comprehensive Post Transit Report (PTR) with his conclusion of the voyage, recommendations for future improvements, incidents report, etc.

The PTR assists both our customers and us, in improving our security services and increasing the level of vessel readiness for the next transit to the HRA. PTRs are available on request by the client and Seagull can also provide bespoke reporting on agreement.

GULF OF GUINEA

Seagull Maritime provides cost-effective maritime security solutions for operations in the Gulf of Guinea and beyond.

Our extensive operations and logistics network in the region is unique. Our operations are in full compliance with international standards as well as regional and national legal frameworks and directives.

Seagull maintains operational control of all deployed assets and maintains advanced maritime domain awareness mechanisms. This in conjunction with the agreements we have with the various host nations' security and intelligence agencies allows us to do more, faster, and in a more reliable fashion.

Seagull Nigeria is a 100% Nigerian registered Private Maritime Logistics and Support Company with the associated statutory permits to operate in the Nigerian maritime space and the wider GoG. We provide and support with:

1. Escort Vessels protection
2. Government Security Teams
3. Maritime Liaison Officers
4. K9 Stowaway Search
5. Shore Side protection
6. Risk Assessments
7. Intelligence Reports
8. Vessel tracking and Monitoring
9. Training and Consultancy
10. Vessel Security Audits
11. K&R Insurance
12. Negotiations & Arbitration

All our services for the Gulf of Guinea are certified to ISO 18788:2015 standard.

Security Escort Vessels

In conjunction with our local partners and operating under the required Memorandum of Understanding (MOU) with the Nigerian Navy, Seagull offers a fleet of SEV's that can be manned with armed security teams comprised of Navy Personnel and capable of supporting any craft transiting the region.

Armed Teams

Seagull can also provide embarked local naval security teams across the region.

Risk Analysis & Intelligence

Through our trusted partner, Vanguard, Seagull can provide our clients with a variety of intelligence and risk-based analysis as well as remote vessel protection. Risk assessments, route planning, piracy updates and digital guards are available via the Vanguard platform.

COMPLIANCE

The PMSC (Private Maritime Security Companies) Industry has seen dramatic change regarding professional standards, regulations, and compliance demands since its inception. Nation-states, companies, and international organizations have all developed Due-Diligence/Vetting Programs for PMSCs to receive authorization to provide Privately Contracted Armed Security Personnel (PCASP) as well as the introduction of dedicated ISO standards for the Indian Ocean and a robust ISO for private security for use across all regions.

Seagull has constructed a robust and experienced compliance team to ensure we are always in front of changing requirements and legislation. To date:

ICoCA - Seagull Maritime is a member of ICOCA.

Seagull is ISO 28007-1:2015. ISO 28000:2022, ISO 9001:2015 and ISO 14001: 2015 certified via leading certification bodies in Greece as well as being ISO 45001 compliant.

Our West Africa division also maintain ISO 18788:2015 certification.

The compliance team works to ensure that Seagull meets all the criteria demanded by the different stakeholders of industry and welcomes both due diligence requests and on-site audits on a regular basis. To date, Seagull has been vetted by several large shipping companies and oil and gas companies gaining approved supplier status.

We operate across all the major flag states and hold licences with those states with such requirements in place, i.e. Liberia, Panama, Guinea Bissau and Gabon. In addition, we can receive approval or no objection letters from the remaining flags such as Marshall Islands, Singapore, Hong Kong, Bahamas and multiple others.

Authorization

Seagull Maritime has all the necessary legal documentations and licenses in place in order to act as a PMSC in all the relevant Indian ocean ports and have the resources capable of identifying any new requirements and working to meet them.

Weapons (EUC)

All our arms are owned by Seagull Maritime, purchased from authorised suppliers and supported by purchase invoices and end user certificates as appropriate.

The firearms in use are semi-automatic rifles, chambered in calibres ranging from 5.45mm to 7.62mm. These are fully compliant with the legal requirements of all major vessel flag administrations under which we operate.

Each operational equipment set includes one rifle per deployed Team Member, stored and transported securely in dedicated peli cases, along with a sufficient quantity of ammunition to meet operational and safety requirements during transits.

Insurance

Seagull Maritime Limited holds all the necessary valid insurances by Lloyd's and through our UK broker "Bellwood Prestbury", and is in accordance with the BIMCO GUARDCON and the maritime industries requirements:

- $5,000,000 public liability
- $5,000,000 employers' liability
- $5,000,000 professional indemnity
- $250,000 personal accident

Contracting

Seagull Maritime is committed to BIMCO GUARDCON. We are aligned with all the requirements and recommendations: insurance, liability, legal documentations, rules of the use of force, etc.

From the BIMCO website:

"BIMCO has developed GUARDCON to assist the industry, and in particular ship owners and their P&I Clubs, by providing a clearly worded and comprehensive standard contract on which they can conclude agreements for security services. "

INTELLIGENCE & RISK ANALYSIS

Through our trusted partner, Vanguard Tech, Seagull can track and report all pirate activities in across the globe. Our team issues real-time attack reports, utilizing both open-source Intelligence and human intelligence, from our difference contacts around the globe as well as official reporting.

Risk assessments are conducted before any task is undertaken with relevant data and reporting provided to the vessel, client and the embarking security detail according to information on recent piracy activities, vessel technical info, route and existing hardening measures on board.

Weekly and monthly reporting is available which recaps the previous week's incidents and provides a forecast on the upcoming week's threats and dangers.

PRA (Port Risk Assessment): Evaluating risks associated with specific ports to enhance maritime security measures.

VRA (Voyage Risk Assessment): Detailed assessments to identify potential vulnerabilities specific to individual vessels and voyages.

Regional/Bespoke Analysis: Tailored intelligence services designed to address specific regional security concerns.

Incident Alerts: Reliable and immediate alerts on maritime security incidents, verified by experts to ensure accuracy

Response Services

- SSAS
- K&R
- Vessel Recovery
- Med-Evac
- Stowaways & Narcotics Recovery

Digital Guard

Vanguard can also enhance your maritime operations' safety, security and efficiency with its Digital Guard service. Real-time insights, monitoring and support can support your operations, CSOs and master's with automated Voyage Risk Assessments (VRA) and continuous monitoring globally, including in high-risk trading areas. Digital Guard allows you to maintain clear and consistent tracking of your fleet even when AIS is down and easily sharing geo-location data with stakeholders to ensure regulatory compliance.

You can automate your Ship Security Alert System [SSAS] test management or fully outsource it to Vanguard to manage your SSAS emergency requirements.
